

Congratulations to Sam's Day!

Dr. David Kaplan Senior Scientist at the Hospital for Sick Children recently received Best Paper Award for the Advances in Neuroblastoma Research 2008 Meeting in Chiba, Japan, for the neuroblastoma cancer stem cell drug discovery project.

This project is co-funded by the James Fund, Sam's Day, and Lilah's Fund, in partnership with the Canadian Stem Cell Network. Dr. Kaplan received a \$1,000 prize of which he has donated to the project.

Your fundraising has made some of the most significant impact on our cause that any fundraising on the planet could hope to accomplish.
